LINK DECORATIVE DESIGNS ANTIMICROBIAL POWDERS

At Link Decorative Design's, we believe technology should serve us all, even in the smallest of things, we are now able to powder coat any high touch surfaces with antimicrobial powder coating colors for everyone's safety, antimicrobial powders come in glossy/texture finishes that make surfaces resistant to microbial growth. The surface that is powder-coated with antimicrobial powder is self-desinfecting and kills 99.9% of bacteria and germs. Antimicrobial powder coating is popular for application in cruise ships, hospitals, schools, restaurant, stadium/arenas, churches, kitchens and bathrooms and any other surface that may be prone to bacterial growth.

6 Garling Road, Kings Park,
