DECORATE YOUR WINDOWS & DOORS WITH LINK DECORATIVE DESIGNS

Link Decorative Design has high resolution finishes that are ideal for decorating doors and windows, offering scratch resistance and maximum durability that lasts a lifetime. The powder coating wood grain process is a sublimation process, using pressure and heat combined. The decorative patterns of faux wood grain are transferred into powder coated surfaces that have been completely cured. This makes your product look like real timber with zero maintenance compared to the natural timber.

6 Garling Road, Kings Park,
